[Must Answer] Task: Integrate API

Weight	:	20	Whom for	:	NA	Difficulty	:	Medium
Importance	:	High	Expected Duration (mins)	:	NA	Level	:	200

Watch the video first. Video link: https://simple.cruip.com/

Now make a front end for CRUD operations for this website. The website must be responsive as shown. The operations to be supported are -
1. Sign up with email address and some basic information-
   - Full name
   - Date of birth
   - Profession
2. Log in
3. Log out
4. Update/Modify basic information
5. Delete account

HTML/CSS code

- Use this git repository for all design components:
  https://github.com/cruip/tailwind-landing-page-template

Bonus

- Incorporate Github & Google sign-in options for bonus marks

Hint and References

- All required design elements have been provided
- Use a Mock API for the task
- Use PostgreSQL or similar one that you prefer. It should not be a NoSQL database

Delivery

- PullRequest, Branch: feature/integrate-api (ask to merge to `develop`)
- Recording: [Don't merge two videos, export videos to at least 1080p]
  - Product Demo(Not coding) : Demonstrate that the product is well achieved and all the actions can be performed. DON'T explain code in a demonstration video. You will be disqualified.
  - Coding Walkthrough : Explain the code briefly as per your understanding. Also explain the database design where it is applicable.

Language/Framework

- ReactJS
- NextJS
- **Typescript**
- Prisma preferred
